

### Abstract of the Disclosure

A display unit is provided, the display unit including a housing configured for mounting in an interior region of a vehicle, and a screen mounted on the housing for movement between a stowed position wherein the screen is at least partially contained within the housing and a deployed position wherein the screen projects from the housing to reveal a viewing surface of the screen. The display unit further includes a lock mechanism adapted to selectively retain the screen in the stowed position. Upon release of the lock mechanism, however, the screen is free to be pivoted away from the stowed position, and in one embodiment, is automatically pivoted at least partially away from the stowed position.
